Summary

U.S. coal production in the week ended July 25, 1992, as estimated from railroad car loadings, by the Energy Information Administration, totaled 19 million short tons. This was 5 percent higher than in the previous

week, but 5 percent lower than in the comparable week in 1991. Production east of the Mississippi River totaled 11 million short tons, and production west of the Mississippi River totaled 8 million short tons.
